## List of contributors

**Stuart Basten** is a researcher at the Department of Social Policy and Intervention, University of Oxford. His thesis on registration practices in northern England was completed in 2008 at the Cambridge Group for the History of Population and Social Structure.

**Ros Davies** is now retired. Formerly she worked at the Cambridge Group for the History of Population and Social Structure where she contributed extensively to studies involving family reconstitution and data linkage. She is a co-author of *English population history from family reconstitution 1580–1837* (Cambridge, 1997).

**Cathy Day** received her PhD from the Australian National University for a thesis entitled 'Marriage patterns in two Wiltshire parishes, 1754–1914: geographical mobility, consanguineity and illegitimacy'.

**Chris Galley** lectures in geography at Barnsley College. He is author of *The demography of early modern towns: York in the sixteenth and seventeenth centuries*, and a number of articles about infant mortality and the use of parish registers in demographic research.

**Eilidh Garrett** is Senior Research Associate at the Faculty of History, University of Cambridge. Her work focuses mainly on fertility and infant mortality during the late nineteenth and early twentieth centuries and she has published in a wide range of academic journals, including *LPS*. She is a co-author of *Changing family size in England and Wales* (Cambridge, 2001).

**John Hall** is a clinical psychologist by background. He is currently both Research Associate in the Centre for Health, Medicine and Society, Department of History, and Visiting Professor of Mental Health at the School of Health and Social Care, at Oxford Brookes University.

**Rebecca Oakes** is a postdoctoral researcher based at the Cambridge Group for the History of Population and Social Structure. The current article is based upon work undertaken for her doctoral thesis. She is now expanding upon this work as part of a British Academy Postdoctoral Fellowship to examine the experiences of scholars into the seventeenth century at Winchester, New College and King's College Cambridge.

**Peter Razzell** has carried out work on English historical demography for more than 50 years. He is currently working on a range of topics, including the accuracy of parish registers, the history of smallpox, and the relationship between wealth, mortality and population change in the period 1500–1900.

**Alice Reid** is a Senior Research Associate at the Cambridge Group for the History of Population and Social Structure, Department of Geography, University of Cambridge. She is a historical demographer specialising in the demography of Britain in the late nineteenth and early twentieth centuries, using individual level data from censuses, civil registers of birth, death and marriage, and health visitor records.
